

HUNTING IN SPAIN

WWW.SIERRADELORO.ES

A HUNTING DAY WITH US:

The thrush hunting begins early in the morning, so before dawn, the reserve's guides accompany the group of hunters to the hunting areas and set up their positions. With the first light of dawn, the thrushes start moving to forage in the vast olive groves of our region, feeding on the olives.

Around 12:30/1:00 PM, we return to the hotel for lunch, followed by a short rest in the afternoon. In the early afternoon, between 3:00 and 3:30 PM, we head back to the field, naturally in different areas than in the morning to ensure good results. We remain in the hunting grounds until dusk, when the thrushes return to the forest to roost for the night.

At the end of the day, we return to the hotel for dinner, spending the evening sharing the day's stories and looking forward to the next morning.
